

FRAMING EQUATIONS

Framing Equations

1. Thrice a number is equal to fifty-four.
2. Eight more than a number is forty-one.
3. The sum of three consecutive even numbers is 72.
4. Square of a number decreased by 20 is 61.

Framing Equations

5. Six more than twice a number is twenty-eight. Find the number.

6. The sum of a number and its half is 54. Find the number.

7. When 8 is subtracted from three times a number, the result is 19. Find the number.

8. If you add 9 to a number, you get the same result as when you double the number and subtract 5. Find the number.

Framing Equations

- 9.** A father is 5 times as old as his son. If the son is 7 years old, how old is the father?
- 10.** The cost of 5 pens and 3 pencils is ₹80. If the cost of each pen is ₹10, find the cost of each pencil.
- 11.** The perimeter of a square is 48 cm. Find the length of each side.
- 12.** Twice the sum of a number and 5 is equal to 32. Find the number.

Framing Equations

13. A shopkeeper sells a bag for ₹250 making a profit of ₹50. Find the cost price of the bag.

14. The difference between two numbers is 14 and their sum is 70. Find the numbers.

15. In a class, there are twice as many girls as boys. If there are 45 students in total, how many boys are there?

Framing Equations

- 16.** A person has ₹2 coins and ₹5 coins amounting to ₹84. If the number of ₹5 coins is twice the number of ₹2 coins, find the number of coins.
- 17.** A man bought 3 shirts and 2 trousers for ₹2800. If a trouser costs ₹200 more than a shirt, find the cost of each.
- 18.** If a train travels at a speed of 60 km/h, it reaches its destination in 4 hours. If it increases speed by 15 km/h, how long will it take?

Framing Equations

19. A two-digit number is such that the sum of the digits is 11.
If 9 is added to the number, the digits interchange their places.
Find the number.

20. The base of a triangle is 3 cm more than its height.
If the area is 44 cm^2 , find the base and height.

Framing Equations

21. By how much is three-fifth of 350 greater than four-seventh of 210?

22. Two-fifth of one-fourth of three-seventh of a number is 15. What is half of that number?

23. One-fifth of a number exceeds on-seventh of the same by 10. The number is:

Framing Equations

24. The ratio of the present ages of Pranav and Qureshi is 4 : 5. Five years ago, the ratio of their ages was 7 : 9. Find their present ages? (in years)

25. A's age after 15 years would be equal to 5 times his age 5 years ago. Find his age 3 years hence.

26. If 2 is subtracted from the denominator of a certain fraction, its value becomes $\frac{1}{2}$ and if '1' is subtracted from its numerator, it become $\frac{1}{3}$. Find the original fraction

Framing Equations

27. The sum of five consecutive natural numbers is 135. Find the second largest number.

28. Two numbers are such that their sum is 63 and their difference is 13. Find the smaller number.

29. Kambli scored 16 runs less than Kumble in a cricket match. The sum of the runs scored by them was 152. Find the runs scored by Kumble.

Framing Equations

- 30.** Two-thirds of a number exceeds one-fifth of the same number by 24. Find the number.
(a) 40 (b) 45 (c) 60 (d) 75 (e) None of these
